DOCUMENT RESUME

ED 100 296 IR 001 349

AUTHOR Nowak, Geraldine D.
TITLE Audio-Visual Aids and Computer Assisted and Programmed Instruction in Allied Health Occupation Education. (Updates Literature Search 72-13).
INSTITUTION National Library of Medicine (DHEW), Bethesda, Md.
PUB DATE 74
NOTE 4p.; Literature Search No. 74-8, May 1972 through April 1974

EDRS PRICE MF-$0.75 HC-$1.50 PLUS POSTAGE
DESCRIPTORS *Audiovisual Aids; *Bibliographies; *Computer Assisted Instruction; *Health Occupations Education; Hospital Personnel; Postsecondary Education; *Programed Instruction
IDENTIFIERS Medical Literature Analysis and Retrieval System; MEDLARS

ABSTRACT

National Library of Medicine (NLM) Literature Searches are selected computer-generated bibliographies produced by the Library's Medical Literature Analysis and Retrieval System (MEDLARS). Selection is made on the basis of a significant current interest of the subject matter to a substantial audience of health professionals. Each Literature Search has been given a short descriptive title with a qualifying subtitle or a brief introductory paragraph indicating the specific point of view of the search. Each citation is listed by author, together with the descriptors selected from NLM's list of medical subject headings (MeSH) under which the article was indexed. Subject headings of a major importance in an article are identified with an asterisk, and the article cited will be found in Index Medicus under those headings. This search covers audiovisual aids, computer assisted and programed instruction in allied health occupations education. (For related NLM Literature Searches see IR 001 346, IR 001 348 and IR 001 350). (Author)

NATIONAL LIBRARY OF MEDICINE

AUDIO-VISUAL AIDS AND COMPUTER ASSISTED AND PROGRAMMED INSTRUCTION IN ALLIED HEALTH OCCUPATION EDUCATION

(Updates Literature Search 72-13)

May 1972 through April 1974. 57 Citations in English

Prepared by Geraldine D. Nowak

Bibliographies on dental, nursing and medical education are also available.

NLM Literature Searches are selected computer-generated bibliographies produced by the Library's Medical Literature Analysis and Retrieval System (MEDLARS). Selection is made on the basis of significant current interest of the subject matter to a substantial audience. For this purpose a MEDLARS search which originally may have been generated for an individual is formulated, photocomposed, and printed for dissemination to other interested health professionals.

Each Literature Search has been given a short descriptive title with a qualifying subtitle or a brief introductory paragraph indicating the specific point of view of the search. Some non-relevant citations may appear and some relevant ones may be absent, but this is to be expected for machine-generated searches.

Each citation is listed together with the descriptors selected from the National Library of Medicine's list of medical subject headings (MeSH) under which the article was indexed. Subject headings of major importance in an article are identified with an asterisk, and the article cited will be found in *Index Medicus* under those headings. *Index Medicus* may be searched under those headings for additional or related citations.

New NLM Literature Searches are announced through monthly notices in *Index Medicus, Monthly Bibliography of Medical Reviews, Journal of the American Medical Association (Book Forum), Drug Research Reports, Journal of the American Dental Association,* and *Public Health Reports.* For a complete list of Literature Search titles write: Literature Search Program, Reference Section, Reference Services Division, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland 20014.
